**SIMPLIFILE AND REKON TECHNOLOGIES ENTER INTO
STRATEGIC INTEGRATION PARTNERSHIP**

PROVO, UTAH – January 7, 2009 – Simplifile, the leader in e-recording, and Rekon Technologies, a leading software vendor in the mortgage loan servicing industry, today announce that they have entered into a strategic partnership to integrate Rekon's lien release and assignment processing system into the Simplifile e-recording system.

The newly formed partnership will allow users of the Rekon processing system to instantly and securely send documents to the Simplifile e-recording system. The solution will automatically upload recordable documents into the customer's Simplifile account and create a new e-recording package. This tight integration allows Rekon users to quickly and easily prepare documents and electronically record them with Simplifile's enabled counties throughout the United States from the convenience of their own office.

"Rekon is known for its advanced method of lien release and assignment document preparation," said Aurora Marsh, CEO of Rekon Technologies. "By integrating Rekon into the Simplifile e-recording system, the combined solution fuels the current industry trend toward paperless solutions. Our strategic partnership with Simplifile provides our clients with an opportunity to build state-of-the-art networks that will give them the edge in delivering excellent customer service, resulting in increased customer satisfaction."

"Simplifile is pleased to work with Rekon to bring the benefits of industry leading lien release and assignment processing with the Simplifile e-recording system," said Erik Blomquist, Simplifile Vice President of Technology. "Rekon is a leader in the mortgage loan servicing industry. With the integration of Rekon into the Simplifile e-recording system, our mutual clients will benefit from the integrated systems to more efficiently prepare and record documents, and virtually eliminate the need for paper documents."

About Simplifile®

Simplifile provides innovative, simple, and secure electronic recording services via the Internet. Simplifile's customers include title companies, banks, attorneys, lien filers, and county and state

government jurisdictions. Simplifile electronic recording services accelerate document recording and simplifies document workflow processes that reduces costly overhead associated with traditional submission and recordation methods while improving client service levels.

Simplifile is focused on building the industry's de facto electronic recording network. As such, Simplifile provides a streamlined and scalable approach to electronic recording tailored to organizations of all shapes and sizes. For more information on how Simplifile can benefit your organization, visit www.simplifile.com or call 801.373.0151.

About Rekon Technologies

Rekon Technologies offers technology solutions to the loan servicing industry, providing tools to track, manage, prepare and record loan documents such as lien releases, assignments, UCC terminations, trailing documents and others.

Rekon Technologies' flagship product and namesake "Rekon" is a fully sustainable workflow driven document preparation and management system, integrated with imaging and eRecording solutions to process loans from payoff to recording in a truly automated and paperless environment from anywhere in the world. Meanwhile, the DokTrak software is considered to be the most versatile document tracking and data warehousing technology solution, especially in resolving the gap between origination and servicing, including the processes of post closing and file certification for securitization. More information about Rekon Technologies and its products is available by visiting <http://www.rekon.com> or calling 626-577-4350.

"Simplifile" is a registered service mark of Simplifile, LC.
