MORRISON COUNTY AND BLUE EARTH COUNTY, MINNESOTA BEGIN E-RECORDING WITH SIMPLIFILE

PROVO, UTAH – July 10, 2009 – Simplifile today announced that Blue Earth County and Morrison County, Minnesota have officially begun electronically recording (e-recording) land record documents submitted by title companies, abstractors, banks, and attorneys through the Simplifile e-recording service.

E-recording is the process of submitting, receiving, and processing documents for recording via the Internet that have traditionally been sent to the county for recording by runner, express mail, or courier service. E-Recording simplifies and accelerates all aspects of the recording process and dramatically improves the county's ability to serve its constituents.

"In today's changing world of technology, e-recording allows the closing companies, lending institutions, and attorney offices a faster and more economical way of getting their documents to the Recorder's office," said Bunny Johnston, Morrison County Recorder. "As it requires no handling of paper documents, it saves time."

"Blue Earth County is continuing to make investments in technology to improve the accuracy and efficiency of all property transactions. E-recording will reduce staff processing time while improving service turnarounds—a win-win for both taxpayers and customers," said Patty O'Connor, Blue Earth County Director of Taxpayer Services (Recorder).

"Simplifile is excited to see the acceleration of e-recording in Minnesota and to lead the expansion of e-recording nationwide," said Paul Clifford, President of Simplifile. "As a market leader in e-recording, we are driven to make the land record submission and recording process easier, more secure, and cost-effective through the use of leading technology."

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet for a wide variety of customers, including title companies, banks, attorneys, lien filers, and County and State government jurisdictions. Simplifile e-recording services accelerate document recording and simplify document workflow processes, significantly reducing costly overhead associated with traditional submission and recordation methods while dramatically improving client service levels.

Simplifile is focused on building the industry's de facto e-recording network. As such, Simplifile provides a streamlined and scalable approach to electronic recording for organizations of all shapes and sizes.
