SIMPLIFILE AND LANDBOSS FORM STRATEGIC ALLIANCE

*Landboss Online Land and Lease Management Software
To Be Integrated Into The Simplifile E-Recording Network*

PROVO, UTAH – February 9, 2010 – Simplifile, the leader in e-recording, and Landboss, a innovator of online land and lease management software, today announced the formation of a strategic alliance between the two companies and the integration of Landboss into the Simplifile e-recording network.

The strategic alliance between the two companies will immediately facilitate the integration of the Landboss online land and lease management software into the Simplifile e-recording network. This integration allows land record documents, such as oil and gas leases, to be electronically recorded with counties and other recording jurisdictions directly from within the Landboss software. The strategic alliance also provides for Simplifile and Landboss to cooperatively market the alliance and resulting service to their mutual customers.

“We are excited to integrate with Simplifile’s industry leading e-recording network. Landboss users will now be able to get their leases and other documents recorded quickly without having to drive to a county courthouse or create a mail package to send to the courthouse,” said Cole Shelton, Managing Partner of Landboss Software.

“Simplifile is pleased to work with Landboss to automate the document recording process,” said Erik Blomquist, Simplifile Vice President of Technology. “Landboss provides a well-designed software solution to make leasing operations easier and more efficient. By integrating Landboss into the Simplifile e-recording network, the combined offering brings the benefits of e-recording to key oil and gas markets nationwide.”

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet. Simplifile’s customers include oil and gas companies, title companies, banks, attorneys, lien filers, and county and state government jurisdictions. Simplifile electronic recording services accelerate document recording and simplifies document workflow processes that reduces costly overhead

associated with traditional submission and recordation methods while improving client service levels.

Simplifile is focused on building the industry's de facto electronic recording network. As such, Simplifile provides a streamlined and scalable approach to electronic recording tailored to organizations of all shapes and sizes. For more information on how Simplifile can benefit your organization, visit www.simplifile.com or call 801.373.0151.

About Landboss

Landboss Software provides land management software and consulting services to the oil and gas industry. Our easy-to-use online land management software allows companies to manage their mineral leases from acquisition to administration in one database. The software connects field landmen to the office and simplifies the job of the office manager who has to compile the landmen's paperwork into meaningful information and packages.

Simplifile is a registered service mark of Simplifile, LC.
