SimplifileSM and Logan Systems Form eRecording Alliance

NORTH CAROLINA – March 05, 2008

In an effort to deliver industry-leading eRecording services to their mutual customers, Utah-based Simplifile, LC and North Carolina-based Logan Systems, Inc. today announced that they have formed a strategic alliance for the purpose of integrating and cooperatively marketing Simplifile's eRecording and Logan System's County Records Management Systems.

The alliance calls for the two companies to integrate their respective eRecording and document imaging and archiving systems, allowing documents electronically filed by Simplifile "submitter" customers such as title companies, law offices and banks to be received, reviewed, recorded and returned to those same submitters by counties utilizing Logan Systems' County Records Management System. The accord also provides for Simplifile and Logan Systems to cooperatively market the alliance and resulting services to their mutual customers, including Simplifile submitters and Logan-enabled counties in North Carolina, South Carolina, Tennessee and Virginia.

"Simplifile is pleased to structure an eRecording alliance with Logan Systems," said Paul Clifford, President of Simplifile. "Our relationship with Logan Systems is further evidence that Simplifile is building the nation's foremost eRecording network for the real estate industry. Our approach to building that network is to partner with trusted records management vendors like Logan Systems that serve the nation's recording jurisdictions. Partnering with Logan Systems enables Simplifile to provide the many advantages of automated recording workflow—including increased productivity, security and profitability—to Logan-enabled counties and the submitters they serve."

Craig E. Sanders, Vice President of Logan Systems, remarked, "Logan Systems is pleased to make Simplifile's e-recording solution available to our customers. When making a decision on partnering with e-filing vendors, we were most concerned about the specific needs of our customers. Simplifile addressed all of our specific requirements and showed tremendous flexibility in their approach. We expect our customers to benefit from Simplifile's expertise in e-recording and look forward to working with them on behalf of our customers."

More than a trend in land record document submission—eRecording is a government priority at federal, state and county levels across the country. eRecording is the process of submitting, receiving, and processing, via a secure Internet site, documents for recording that have traditionally been delivered to the county for recording by runner, express mail, or courier service. eRecording offers thousands of submitters nationwide filing documents into eRecording-enabled counties the ability to simplify, accelerate and enhance all aspects of the recording process.

Individuals and organizations that do business with Simplifile and Logan Systems can contact the two companies directly for information on how they can benefit from this strategic alliance.

#####

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet for a wide variety of customers, including title companies, banks, attorneys, lien filers, and county and state government jurisdictions. Our eRecording services accelerate document recording and simplify document workflow processes, significantly reducing costly overhead associated with traditional submission and recordation methods while improving client service levels dramatically.

Simplifile is focused on building the industry's de facto eRecording network. As such, we provide a streamlined yet scalable approach to electronic recording tailored to customers of all shapes and sizes. For more information on how Simplifile could benefit your county, visit simplifile.com or call 800.460.5657.

"Simplifile" is a registered service mark of Simplifile, LC.

About Logan Systems, Inc.

Logan Systems has been providing professional services to Registers of Deeds and Clerks of Circuit Court for land record data management since 1988. Our turn key service includes all hardware, software, training and support required to operate the land record portion of the office. Logan Systems also provides conversion services such as the conversion of original books and microfilm, including advanced software applications for imaged index books and Photostats.
