NET Data Joins Simplifile eRecording Alliance

TEXAS – April 16, 2008

In an effort to deliver industry-leading eRecording services to their mutual customers, Utah-based Simplifile, LC and Texas-based NET Data Corporation today announced that they have formed a strategic alliance for the purpose of integrating and cooperatively marketing Simplifile's eRecording and NET Data's County Records Indexing Systems.

The alliance calls for the two companies to integrate their respective eRecording and document imaging and archiving systems, allowing documents electronically filed by Simplifile "submitter" customers such as title companies, law offices and banks to be received, reviewed, recorded and returned to those same submitters by counties utilizing NET Data's County Records Indexing System. The accord also provides for Simplifile and NET Data to cooperatively market the alliance and resulting services to their mutual customers, including Simplifile submitters and NET Data-enabled counties in Texas.

"Simplifile is pleased to welcome NET Data to our eRecording partner alliance," said Paul Clifford, President of Simplifile. "Our relationship with NET Data is further evidence that Simplifile is building the nation's foremost eRecording network for the real estate industry. Our approach to building that network is to partner with trusted records management vendors like NET Data that serve the 3,600 recording jurisdictions nationwide. Partnering with NET Data enables Simplifile to provide the many advantages of automated recording workflow—including increased productivity, security and profitability—to NET Data-enabled counties and the submitters they serve."

"NET Data is excited to make Simplifile's e-recording solution available to our customers," said Scott Stahl, Vice President of NET Data. "When making a decision on eRecording vendors, we were most concerned about the specific needs of our customers. Simplifile eRecording Services most closely aligned with our customers' requirements for a secure, easy-to-use, always-on eRecording service. We look forward to working closely with Simplifile to bring the many benefits of eRecording to our mutual customers."

More than a trend in land record document submission—eRecording is a government priority at federal, state and county levels across the country. eRecording is the process of submitting, receiving, and processing, via a secure Internet site, documents for recording that have traditionally been delivered to the county for recording by runner, express mail, or courier service. eRecording offers thousands of submitters nationwide filing documents into eRecording-enabled counties the ability to simplify, accelerate and enhance all aspects of the recording process.

Individuals and organizations that do business with Simplifile and NET Data can contact the two companies directly for information on how they can benefit from this strategic alliance.

#####

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet for a wide variety of customers, including title companies, banks, attorneys, lien filers, and county and state government jurisdictions. Our eRecording services accelerate document recording and simplify document workflow processes, significantly reducing costly overhead associated with traditional submission and recordation methods while improving client service levels dramatically.

Simplifile is focused on building the industry's de facto eRecording network. As such, we provide a streamlined yet scalable approach to electronic recording tailored to customers of all shapes and sizes. For more information on how Simplifile could benefit your county, visit simplifile.com or call 800.460.5657.

"Simplifile" is a registered service mark of Simplifile, LLC
