Simplifile and eFileCabinet Structure Strategic Alliance

PROVO, UTAH – July 15, 2008 — Working to increase office productivity and provide industry-leading eRecording services, Utah-based Simplifile, LC and eFileCabinet today announced the integration of Simplifile eRecording Services into eFileCabinet's electronic document management software solutions.

The integration of these systems allows documents electronically captured and managed by eFileCabinet to be seamlessly and securely transmitted to the Simplifile eRecording Service for submission to recording jurisdictions (counties) nationwide on the Simplifile network. Those documents are then received by the target county, reviewed, recorded and returned via Simplifile for convenient archiving and retrieval. The seamless and roundtrip workflow from eFileCabinet through Simplifile to the County Recorder's Office and back again is the result of a strategic alliance that calls for the integration and cooperative marketing of the combined archiving and workflow services.

"Simplifile is dedicated to automating mortgage process workflow to include round-trip electronic recording. Our commitment to providing our customers with fully automated workflow is the very reason we have elected to partner with eFileCabinet," said Paul Clifford, president of Simplifile. "eFileCabinet is a leading provider of electronic document management systems, and we are honored to structure an alliance that enables our mutual customers to enhance the value of their investment in document management and eRecording systems. We look forward to offering the many benefits of Simplifile eRecording Services—including increased productivity, security and profitability—to eFileCabinet customers."

"eFileCabinet and Simplifile have each delivered significant transformations in product innovation and customer satisfaction to our respective markets," said Matt Peterson, president and CEO of eFileCabinet. "Our strategic alliance is a decisive step forward in helping our mutual customers realize the benefits of advanced eRecording and electronic document management in a seamless, turn-key solution."

More than a trend in land record document submission—eRecording is a government priority at federal, state and county levels across the country. eRecording is the process of submitting, receiving, and processing, via a secure Internet site, documents for recording that have traditionally been delivered to the county for recording by runner, express mail, or courier service. eRecording offers thousands of submitters nationwide filing documents into eRecording-enabled counties the ability to simplify, accelerate and enhance all aspects of the recording process.

Individuals and organizations that do business with Simplifile and eFileCabinet can contact the two companies directly for information on how they can benefit from this strategic alliance.

About Simplifile

Simplifile provides innovative, simple, and secure electronic recording services via the Internet for a wide variety of customers, including title companies, banks, attorneys, lien filers, and county and state government jurisdictions. Our eRecording services accelerate document recording and simplify document workflow processes, significantly reducing costly overhead associated with traditional submission and recordation methods while improving client service levels dramatically.

Simplifile is focused on building the industry's de facto eRecording network. As such, we provide a streamlined yet scalable approach to electronic recording tailored to customers of all shapes and sizes. For more information on Simplifile eRecording services, visit www.simplifile.com or call 800.460.5657.

"Simplifile" is a registered service mark of Simplifile, LC.
