

Simplifile eSign Events

Provide an easy, consumer-friendly experience for eSigning and eNotarizing documents.

With Simplifile® eSign Events, you can send documents to a customer to eSign, as well as facilitate in-person notarization (IPEN), and remote online notarization (RON) sessions. Simplifile's industry expertise is baked into eSign Events to help users know if a recording jurisdiction will accept eNotarization transaction types. When looking for a solution to take care of all your eSigning needs, consider eSign Events.

Features and benefits

Ancillary documents (no witness needed)

- Seamless authentication via mobile devices for your consumers
- Unlimited eSigning for a low monthly fee
- Quick re-creation of events with similar documents
- Simple ability to tag documents with signature coordinates
- Transparency into the real-time status of signing participants

Document packages using IPEN

- All the features of non-witnessed events, plus:
 - Support for notary-specific digital certificates
 - Ability for signers to bring their own device or share the notary's device

Document packages using RON

- All the features of non-witnessed and IPEN events, plus:
 - Secure sign-on authentication, using knowledge-based authentication and automated ID verification
 - Support for state-specific requirements
 - Teleconferencing support, eliminating the need for signers to be in the same location as the notary
 - Ability to supply your own notary to the transaction, allowing you full control over the experience
 - Ability to include non-signer participants like a Realtor or advisor
 - Ongoing access and storage of the RON video recordings
